COMPANY PROFILE 2025

BUILDING SMARTER SAUDI ARABIA

MAX GENE LLC

A high-tech systems integrator delivering ELV, ICT, Security, MEP, and Telecom solutions across the Kingdom — from concept to commissioning.

ABOUT US

We are a **high-tech enterprise** specializing in Smart and Connected Systems Integration with a proven track record across the Kingdom of Saudi Arabia.

We specialize in the design, engineering, and implementation of solutions across **Government, Healthcare, Telecom, Retail, Logistics, Education, Airports,** and Buildings — converting concepts into deployable solutions.

Our products carry **CE, GS, UL, and TUV certifications** — ensuring long lifespan, low maintenance cost, and wide international acceptance.

CORE STRENGTHS

Mission

Unify strategy and technology to deliver world-class consulting, solutions, and services — helping clients achieve sustainable growth.

Vision

Inspire change through people-first solutions, transforming IT and ELV components into specialized products via intelligent engineering design.

Certified Quality

CE · GS · UL · TUV certified products ensuring high quality, long lifespan, and low maintenance across all our solutions.

SA

Vision 2030

Actively supporting Saudi Vision 2030 through smart infrastructure, 5G deployment, IoT, and national digital transformation.

— OUR MISSION

Unify Strategy & Technology

Our mission is to unify strategy and technology, creating world-class consulting, solutions, and services for enterprises. We aim to help our clients achieve sustainable business growth by providing optimized computing solutions.

From concept ideation to manufacturing and after-market services, we prioritize quality, integrity, and effective communication in every step of our journey.

— OUR VISION

Inspire Change. Open Possibilities.

MAX GENE envisions inspiring change and opening possibilities in the world of people-first solutions and services. We strive to empower organizations by delivering cutting-edge IT infrastructure design solutions.

Our vision is to transform IT components into specialized products through intelligent engineering design, fostering innovation and efficiency.

— OUR CORE VALUES

**Integrity**

Transparent and honest business dealings in everything we do

**Innovation**

Intelligent engineering design fostering efficiency and creativity

**Excellence**

World-class consulting and certified, future-proof solutions

**Reliability**

CE, GS, UL & TUV certified — zero compromise on quality

ELV / AUTOMATION

ELV / AUTOMATION

Guest Management System

Streamline hospitality operations with our all-in-one Guest Management System. From effortless check-ins to personalized preferences, we deliver seamless digital experiences that elevate service quality.

- Self check-in / check-out kiosks and mobile integration
- Guest preference tracking and personalization engine
- Room management and housekeeping workflow automation
- Real-time occupancy dashboards and reporting

01

ELV / BUILDING AUTOMATION

Building Management System (BMS)

Centralize HVAC control, energy management, and facility operations through a unified BMS platform. Optimize energy consumption and maintain superior indoor environments across commercial buildings.

- Centralized HVAC and climate control automation
- Energy monitoring and consumption optimization
- Lighting and access integration via single platform
- Preventive maintenance scheduling and fault alerts

02

BUILDING AUTOMATION

— ELV / LIFE SAFETY

Fire Alarm System (FA)

Protect lives and assets with addressable fire detection and alarm reporting systems. Compliant with international standards and engineered for rapid, accurate detection across all facility types.

- Addressable and conventional fire detection panels (Notifier, Honeywell, Simplex, Bosch)
- Smoke, heat, and multi-criteria detectors with call points
- Wireless, conventional, and intelligent/smart FA systems
- Integration with suppression and PA/VA evacuation systems

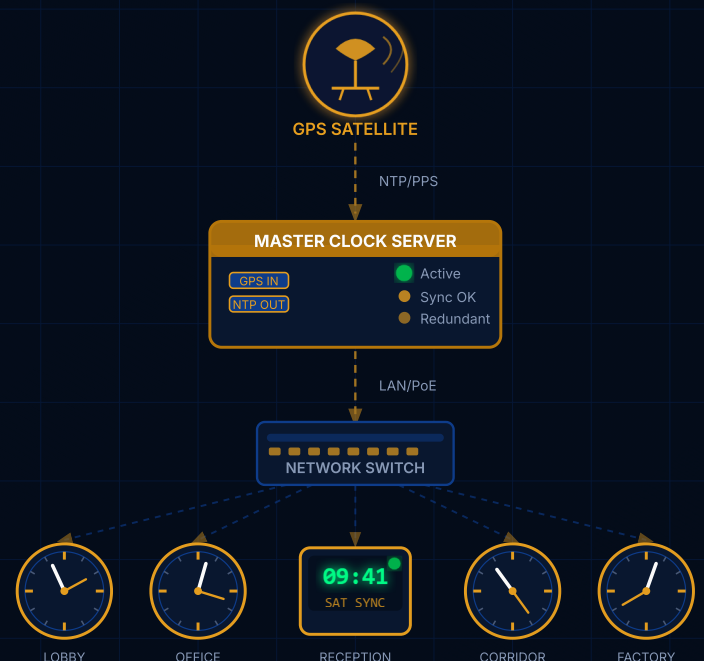

— ELV / SPECIALIZED

Master Clock Systems

Centralized time synchronization for institutional and industrial facilities. GPS-synchronized master clock systems ensure every display and time-dependent system stays perfectly aligned — critical for hospitals, airports, and factories.

- GPS-synchronized master clock with NTP/PTP output
- Digital and analog secondary clock networks
- Wireless and wired distribution topologies
- Integration with BMS and IT infrastructure

MASTER CLOCK SYSTEM ARCHITECTURE

⚡ GPS / NTP Synchronized
⚡ Accuracy: ±1ms

⚡ Protocol: NTP / PTP IEEE 1588
⚡ Secondary clocks: up to 512

GPS-SYNCHRONIZED
±1ms precision across all displays

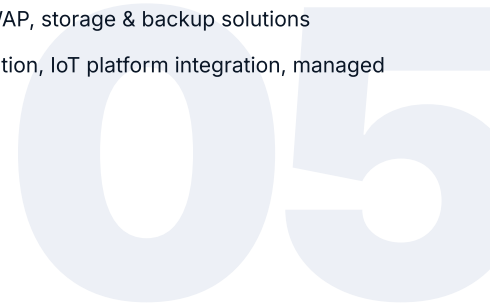

ICT / DATA SYSTEMS

— ICT / DATA SYSTEMS

Enterprise Networking

End-to-end network design, automation, IoT integration, and managed ICT services under one roof. We architect enterprise-grade infrastructure that scales with your business and supports digital transformation.

- Data Centre design, support infrastructure and monitoring
- Structured cabling: UTP CAT6/CAT6A/CAT7/CAT8, OM3/OM4 fiber
- Wireless LAN, WAP, storage & backup solutions
- Network automation, IoT platform integration, managed services

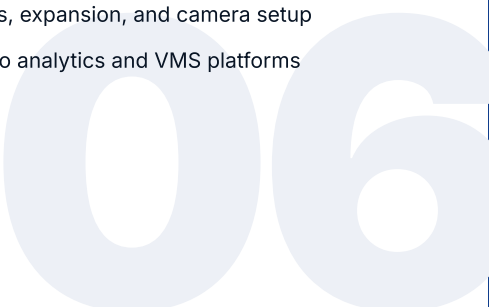

— LCS / SECURITY SURVEILLANCE

CCTV & Security Surveillance

IP and analog camera systems, NVRs, and video management software for sites of any scale. Crystal-clear imaging, intelligent video analytics, and centralized monitoring for complete situational awareness.

- CCTV installation, repair, and DVR/NVR maintenance
- Residential, commercial, and remote monitoring solutions
- System upgrades, expansion, and camera setup
- AI-powered video analytics and VMS platforms

SURVEILLANCE

ACCESS CONTROL

LCS / ACCESS CONTROL

Access Control Systems

Card, biometric, and mobile-credential access control from single doors to full campuses. Manage permissions, track access events, and enforce security policies from one centralized platform.

- Card, fingerprint, face recognition, and mobile credentials
- Multi-door and multi-site centralized management (ZKTeco)
- Time and attendance integration
- Real-time access logs and audit trail reporting

LCS / SECURITY

Intrusion & Burglar Alarm Systems

Perimeter and zone-based intrusion detection with monitored alarm reporting. 24/7 protection with instant notification to security teams, reducing response times and deterring unauthorized access.

- PIR, microwave, and dual-technology motion detectors
- Zone-based intrusion panels with remote arming
- Central monitoring station (CMS) connectivity
- Integration with CCTV for verified alarm response

INTRUSION DETECTION

PA / VOICE EVACUATION

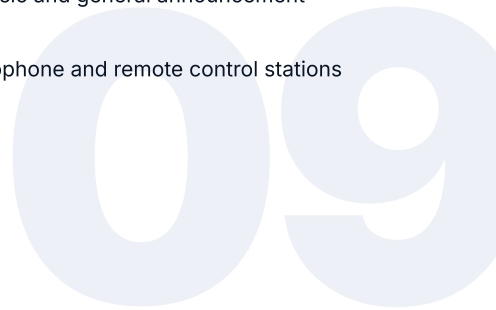

ELV / LIFE SAFETY

Public Address & Voice Evacuation

Life-safety announcement and general paging systems for commercial and industrial buildings. Clear, reliable communication during emergencies and day-to-day operations across every zone.

- EN 54-certified voice evacuation systems
- Zone-by-zone paging and priority message routing
- Background music and general announcement integration
- Fireman's microphone and remote control stations

HEALTHCARE

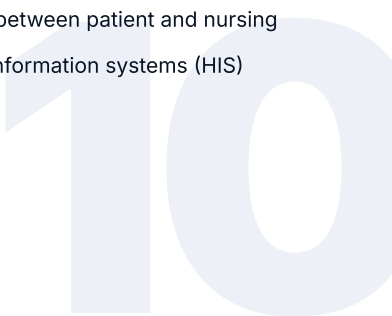

ELV / HEALTHCARE

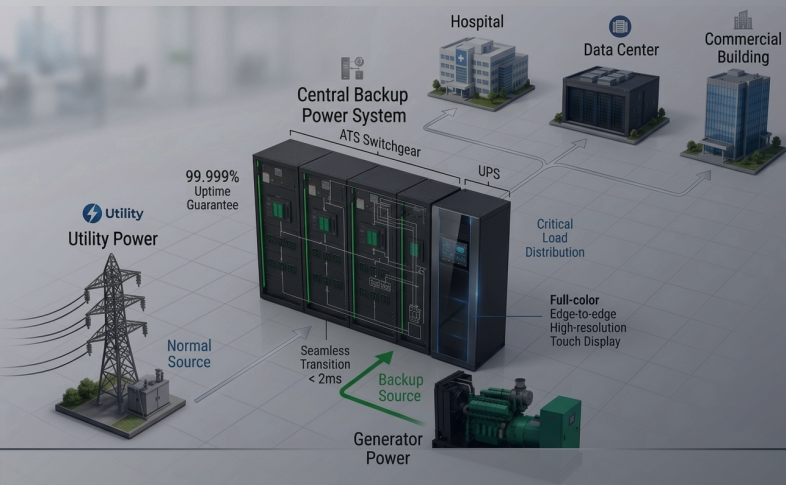

Nurse Call & Intercom Systems

Nurse call stations and intercom networks for healthcare and institutional facilities. Fast, reliable patient-to-staff communication improving response times and patient care quality.

- Patient call stations and corridor dome light indicators
- Staff duty station panels with call prioritization
- Two-way audio intercom between patient and nursing
- Integration with hospital information systems (HIS)

POWER SYSTEMS

ELV / POWER SYSTEMS

UPS & Central Battery Systems

Uninterruptible power supply and central battery systems supporting emergency lighting and critical loads.

Guaranteed power continuity for life-safety systems, data centers, and mission-critical operations.

- Online double-conversion UPS for critical equipment
- Central battery systems for emergency lighting compliance
- DC Power Systems including rectifiers (Telecom grade)
- Battery monitoring with self-test and fault reporting

LCS / INDUSTRIAL

Industrial Security

Safeguarding industrial assets and critical infrastructure with layered security systems designed for harsh environments. Integrated perimeter protection, intrusion, CCTV, and access control in one platform.

- Perimeter fence detection and thermal cameras
- Critical asset protection and restricted zone control
- Explosion-proof equipment for hazardous areas
- Integrated PSIM command center dashboards

INDUSTRIAL SECURITY

PARKING SYSTEMS

LCS / SMART FACILITIES

Parking Management Systems

Automated entry, guidance, and payment systems for parking facilities. Smart solutions reduce congestion, maximize space utilization, and deliver a frictionless experience for drivers and operators.

- ANPR license plate recognition entry/exit barriers (BFT)
- Indoor guidance with bay occupancy sensors
- Multi-payment: cash, card, mobile, and app
- Real-time occupancy reporting and revenue management

LCS / SMART FACILITIES

Queue Management Systems

Ticketing and queue-routing systems for banks, hospitals, government offices, and retail. Reduce wait times, improve satisfaction, and measure service performance with real-time analytics.

- Self-service ticket kiosks and mobile queue tokens
- Digital signage displays and audio call announcements
- Service counter management and staff allocation
- Wait time analytics and satisfaction reporting

QUEUE MANAGEMENT

RENEWABLE ENERGY

ELV / ENERGY

Renewable Energy Systems

Solar and renewable energy system design and integration supporting Saudi Vision 2030's renewable targets. We design, supply, and install grid-tied and off-grid solar PV systems that reduce costs and carbon footprint.

- Rooftop and ground-mounted solar PV system design
- Grid-tied, off-grid, and hybrid configurations
- Solar inverters, battery storage, and energy management
- Performance monitoring and remote yield reporting

MEP / MECHANICAL

HVAC Systems

Heating, ventilation, and air conditioning design, supply, and installation for commercial buildings. Energy-efficient HVAC solutions tailored for Saudi Arabia's climate — optimal comfort, air quality, and efficiency.

- Central chilled water and VRF system design
- Ducted and ductless split unit installations
- Fresh air handling and ventilation systems
- BMS-integrated HVAC control and energy monitoring

HVAC SYSTEMS

ELECTRICAL WORKS

MEP / ELECTRICAL

Electrical Works

Power wiring, panel installation, and complete electrical fit-out for commercial and industrial sites. Everything from MV/LV switchgear to final circuit wiring — safe, code-compliant installations built to last.

- MV/LV distribution panels and switchgear
- Power, lighting, and small power circuit installations
- SCADA cable laying, termination, RTU/MTU installation
- Testing, commissioning, and as-built documentation

MEP / ELECTRICAL

Grounding & Lightning Protection

Earthing pits, bonding networks, and lightning protection systems to protect equipment and personnel. Compliant with IEC 62305 and SASO standards — providing a safe electrical foundation for every facility.

- Earthing pits, copper rods, and equipotential bonding
- Earth resistance testing and soil resistivity surveys
- ESE and Franklin rod air terminal systems
- Surge protection devices (SPD) for equipment

GROUNDING & LIGHTNING

TELECOM / OSP

TELECOM DIVISION

Telecom Solutions & OSP Services

End-to-end telecommunications infrastructure design and deployment. Trusted partner in the dynamic realm of telecom — offering innovative solutions that drive connectivity, efficiency, and scalability.

- Turnkey OSP solutions (civil works) and tower erection
- Fiber optic ISP & OSP systems (ODF, MDF, enclosures)
- DAS distributed antenna systems for indoor coverage
- 5G implementation with Ericsson, Nokia, and Huawei

TELECOM / UNIFIED COMMS

IP PBX / PABX & Unified Communication

Modern business telephony systems built around IP PBX platforms. We unify voice, video, messaging, and collaboration — enabling seamless communication whether teams are in-office or remote.

- IP PBX and hybrid PABX platform deployment
- SIP trunking, VoIP gateway, and UC integration
- Call recording, IVR, and call center features
- IP Telephony and audio-visual systems integration

UNIFIED COMMS

IP PBX / PABX UNIFIED COMMUNICATION

FLEET / IOT

LOGISTICS / IOT

Vehicle Tracking System

Whether managing a single car or a fleet of commercial vehicles, MAX GENE's GPS tracking solutions offer absolute accuracy — giving you peace of mind and security through a robust satellite network and cutting-edge technology.

- Real-time GPS fleet tracking and route optimization
- Vehicle behavior monitoring and driver analytics
- Geo-fencing and alert notifications
- Web and mobile fleet management dashboards

MEP DIVISION

Mechanical, Electrical & Plumbing (MEP)

Complete MEP design and execution for building and infrastructure projects. Our team coordinates mechanical, electrical, and plumbing works across the full lifecycle — from concept design through commissioning and handover.

- Integrated MEP design with BIM coordination
- Plumbing, drainage, and fire protection piping
- Communication room works and material supply
- Full commissioning, testing, and O&M documentation

FM / AMC

Facility Management & Annual Maintenance Contract

MAX GENE provides comprehensive FM and AMC services — from preventive maintenance to 24/7 emergency response — ensuring zero downtime and maximum asset longevity across all installed systems.

- Preventive & corrective maintenance for ELV, ICT, and Security systems
- AMC with defined SLA and guaranteed response times
- 24/7 emergency support and on-site technician deployment
- HVAC, MEP, and building systems periodic servicing
- Asset tracking, health reporting, and lifecycle management
- Dedicated account manager and monthly service reports

SECTORS SERVED

8+

YEARS SERVING

— OUR WORK

Key Projects

TELECOM INFRASTRUCTURE

5G Network Implementation Ericsson · Nokia · Huawei

- Installation of GSM Antennae and Microwave systems
- Supply and installation of Feeders, connectors, and jumpers
- RSB / BTS installation with peripherals and rectifiers
- Installation of TMR and Fire Alarm System (M.D.F)
- Testing, commissioning, BTS alarm troubleshooting
- Grounding of feeders and cable ladder installation

LOW CURRENT / CIVIL / IOT

Integrated Smart Building Civil & IoT Projects

- Electrical supply, installation, and loop checking
- Earth wire junction and concrete manhole civil works
- Plumbing works: internal sewerage and water lines
- Repair and refurbishment of rainwater drainage systems
- Supply and installation of vinyl flooring and sun shade
- Lock, handle, and toilet accessory installation
